### CHAPTER I

**Anubis.**

2. Collar of Seker-kha-bau | 1, 2 |
3. Royal gods | 2, 3, 4 |
4. Priesthoods of Anubis | 4 |
5. Sacrifice of the King | 4, 5, 6 |
6. Epithets of Anubis | 6, 7 |
7. Horus and Anubis | 7 |

### CHAPTER II

**Other Early Deities.**

8. Bast | 7, 8 |
9. Hat-hor | 8, 9 |
10. Neith | 9 |
11. Rui | 9, 10 |
12. Seshat | 10, 11 |

### CHAPTER III

**By Kurt Sethe.**

**Translation of Inscriptions.**

13. Kha-bau-Seker | 11, 12 |
14. Ka-em-hesut | 12 |
15. Khuyu-en-Ptah | 12 |
16. Hotep-Akhti-her | 12, 13 |
17. Sheikh el Beled | 13 |
18. Ptah-hotep I | 13 |
19. Ptah-hotep desher | 13 |

### CHAPTER IV

**Translation—Continued.**

20. Ptah-hotep II | 14, 15, 16, 17 |
21. Ateta | 17, 18 |

### CHAPTER V

**By Kurt Sethe.**

**Translation—Continued.**

22. User-neter | 18, 19, 20, 21 |
23. Shepses-Ptah I | 21 |
24. Shepses-Ptah II | 21, 22, 23 |

### CHAPTER VI

**Translation—Continued.**

25. Sekhem-kay | 23, 24, 25 |

### CHAPTER VII

**Details from the Tomb of Ty.**

26. Scenes in the marshes. Cattle crossing water | 25, 26 |
27. Details of offerings. Beasts, Birds | 26, 27 |

### CHAPTER VIII

**Hieroglyphs from the Tomb of Ty.**

29. Comments on some signs | 27, 28, 29 |

*This volume is the eleventh memoir of the series, referring to work in 1904 and 1905.*

SAQQARA MASTABAS

PART II

INTRODUCTION.

1. This volume contains the important translations by Professor Kurt Sethe of the inscriptions in *Saqqara Mastabas* I. His MS was not finished till after that volume had appeared. It has remained unpublished awaiting the publication of the second volume, and during the interval the illustrious author has passed away. This volume is therefore the poorer in not having his corrections of the MS and the proofs. The only alterations I have made in his work are in the transliterations where newer and more accurate forms have been discovered—often by Professor Sethe himself—since his three chapters were written. The plate references in Professor Sethe's chapters are to volume I.

The drawings from the tomb of Ty were made by Lady Petrie, Miss Hansard (Mrs. Firth), and Miss Kingsford (Lady Cockerell). These were made before the publication of the tomb by Professor Steindorff, but it was considered advisable to publish them here on a sufficiently large scale for detailed study.

For the same reason the figure of Seker-kha-bau is reproduced on a large scale. Miss Hansard's careful drawing of the necklace was the first indication to me of the importance of that priestly ornament. So little is known about any of the early deities that I have thought it worth while to make a short study of a few of those mentioned in the Saqara tombs published in volume I, and in the forthcoming volume *Seven Memphite Tomb Chapels* copied by Lady Petrie and her staff.

CHAPTER I.

ANUBIS.

2. In *Saqqara Mastabas* I the false door of Seker-kha-bau is reproduced on too small a scale to permit of the collar or necklace being seen in full detail. As this ornament appears to be part of the official insignia of the priesthood, it seemed worth while to reproduce the upper part of the figure of Seker-kha-bau on a sufficiently large scale for careful study (Pl. I).

Besides the collar there are a few points which are worth noting. Though the wife of Seker-kha-bau has the same short-nosed type of face as Zoser, the man himself is not only unlike her but is also unlike any other portraits of officials surviving from the Illrd and IVth dynasties. The big, rather aquiline, nose, the large projecting lips and the short chin combine to give a sinister cast of countenance which resembles the portrait of Sa-nekht (Petrie, *Researches in Sinai*, pl. 48), and shows that this is truly a likeness and not a conventionalised representation of a priest of high rank. The likeness between Seker-kha-bau and Sa-nekht is sufficiently close as to suggest a blood relationship between the two.

For the description of the dress see vol. I, p. 3. The wig must, I think, have had as its foundation a close-fitting cloth cap on which the twists of hair were sewn. There are three lengths of these twists; the longest falls from the crown of the head to the top of the ear, the next row is about the length of the ear, and the shortest comes from the lower part of the ear to the nape of the neck. (For the method of arranging a wig of this kind, see M. Gauthier Laurent in *Mélanges Maspero*, p. 85 seq.)

The most important item of the dress is, however, the collar. Though this is a very early period of Egyptian art, the collar is an example of that stylization which was the curse of the Egyptian artist; and it represents in a highly conventionalised form a much earlier and more primitive object. It consists of two parts, one lying over the other. The under portion is evidently made of some rigid material such as metal, possibly gold. It is held round the neck of the wearer by a ring; attached to the ring are three bars shaped like the zigzag sign for water; the middle bar runs down vertically, the two side bars flare out to right and left respectively. At their lower ends the three bars
are fastened to a curved bar. At the side of the junction of the right and left bars with the curved bar is a knob. I suggest that in the original object the knob was a knot, and that the bar was perhaps a cord of some kind; or, if it were originally made of a rigid material, that the knot was part of the string which tied the zigzag to the curved bar. The central zigzag ends in a ring, which I suggest was originally a ring-amulet of fibre or string, of the kind found in later times. The knobs and ring project beyond the curved bar of which they are here represented as forming part.

The curved bar appears to belong to the zigzags and to have had no original connection with the continuation on each side of the curve. This continuation is so formed as to represent the figure of Anubis, the head at one shoulder of the wearer, the tail at the other. Like all early figures of jackals, the body is exaggeratedly thin. The animal is represented with two human arms, of which the hands are held near the snout, in which is possibly an attitude of adoration. (Cf. the gesture with that of Neheb-ka, also an early deity.) Lower down the body are two feet so entirely stylized that they would be unrecognizable as feet if detached from the body. The animal is thus complete—with head, body and four limbs, though without a tail—on one side of the ornament. On the other side is the body of a jackal with four feet and a tail but without a head. The ornament is so conventionalised and altered from its earliest form that it is impossible to say whether there were originally two jackals, one on each side; or whether there was but one slab across the chest of the wearer with the head pointing to one shoulder, the tail to the other. The little hind-legs immediately under the tail seem to show, by their size and position, that they were originally part of the tail and that the maker of the collar had misunderstood their meaning. The late forms studied by Erman (Z.A.S., 1894, pp. 18 seq.) show that in the New Kingdom there was only one jackal across the priest’s chest. Owing to the limitations of relief-sculpture, it is uncertain whether this part of the necklace was cut out of sheet metal, i.e. was flat, or whether the figure of the jackal was modelled in relief or in the round.

The second part of the necklace which overlay, and was distinct from, the stiff bars consists of twelve strings hung round the neck. The strings are graduated in length, and on each is hung a single pendant. On the first three are ankhs, the next three hold disks, then come three more ankhs, and lastly three disks; six ankhs and six disks in all. The ankhs are threaded through the oval loop which is an integral part of the sign, the disks have a ring at the top through which the string passes; the ring shows that the object is not a bead, and the circular hollow in the centre indicates that it is a disk, not a ball.

The significance of this remarkable ornament has never attracted much attention. It has been suggested, and the suggestion has been generally accepted, that it was part of the insignia of the High Priest of Memphis. I am, however, of the opinion that this is not the true explanation. The principal arguments against it are: (1) that the ornament is excessively rare, whereas the number of known High Priests of Memphis is relatively great, especially in the Old Kingdom; and (2) that Seker-kha-bau, though he uses the title of sekhem hemti (\(\text{\textcopyright}^\gamma\text{\textcopyright}^\gamma\)) has not the full title which betokens the High Priest. It seems, then, that the ornament, in the Old Kingdom at any rate, must refer to some other priesthood, and the importance in it of the jackal strongly suggests a priesthood of Anubis.

3. Anubis is a god of whom very little is known. No special locality or district belongs to him and therefore no temple is dedicated to his sole worship, though he occasionally has chapels built in his honour in the temple of some other god. His function is that of Death; he has not, like Osiris or Seker, any connection with the life after death; he is Death personified. He is an early deity, and as such he belonged originally to the Pharaoh alone. Like all primitive deities he has no consort, and till late times he stands alone without any connection with other gods or goddesses. His inclusion in the Osirian Cycle is not only late but too vague to be convincing.

The standard of Anubis was one of the earliest of the royal standards, and was carried before the King in the earliest times of which there is any record. On the mace-heads of the Scorpion King and of Narmer, his standard comes next to the emblem of birth, thus symbolizing the beginning and end of the royal life.

The position of Anubis in regard to the rest of the Egyptian pantheon has never been accurately studied; he has been called the God of Death, and that is all. I therefore venture to make here a few suggestions.

The clearest classification of the Egyptian
pantheon which has yet been made is by Petrie (Religion and Conscience, p. 68 seq.). I use it as the basis of my argument, though with some modifications, arranged thus:—

1. Local deities. Usually animal or animal-headed. These are probably the most primitive deities.

2. The Osiris Cycle. The dogmas of the Osirian worship were not fully established till the New Kingdom. Even so late as the Pyramid Texts, Seth is the friend and helper of Osiris. The original Osiran group consisted of Osiris, Isis and Nephthys only; Seth, Horus and Anubis are late additions.

3. The Royal Gods. Here the continual changes in the Kingship must be taken into account. The sun, which was so essentially the royal deity in the New Kingdom, is unknown in the early periods. This fact is clearly shown by the royal names which (with the exception of Neferka-Ra) are never compounded with Ra till the IVth dynasty. The legend of the birth of the Kings of the IVth dynasty indicates the introduction of sun-worship and shows that it was peculiar to the royal family.

In following out the development of the Egyptian religion it must be remembered that that religion was never static, and that democratization is an influence to be reckoned with. The ideas and dogmas originally belonging only to the King spread gradually to the higher ranks of the nobles, thence to the lesser officials, and finally permeated all classes. The Osiran dogmas are a good instance of the democratization of an idea. The contrast between the Pyramid Texts and the Book of the Dead is also worth noting; the one being for Kings only, the other for the generality of mankind. Unfortunately, in studying the religion, the greater number of Egyptologists have been influenced by the classical authors and late texts, and have not realised the changes which took place in the long course of Egyptian religion. The consequent result is that Ra is regarded now as having been always the supreme deity of Egypt. But in the proto-dynastic period, to which Seker-kha-bau belonged, the pantheon, particularly the early gods, were very different from those of a later time. There is reason to believe that in the early religion the deities, other than the local gods, belonged to the Kings only. A local god or goddess was worshipped by the people of the district which he or she governed, but deities like Anubis or Heqt, who had no local status and therefore no temple, were special deities belonging only to the Pharaoh, the incarnate God. Our knowledge of the Egyptian religion is still so fragmentary that it is essential to study the early gods singly and in detail. Till this has been done adequately and from an anthropological point of view, the Egyptian religion will remain to modern eyes entirely formless and static.

Besides the god Seker, whose name is compounded in the personal name, only four other divinities are mentioned in the inscriptions of Seker-kha-bau; these are Anubis, Seth, Seshat, and the fetish of the Oxyrhynchus nome. Of the last nothing is known; the drawing of the object, which possibly represents the name of the local god, gives no clue to its real meaning. Yet it was obviously divine, as Seker-kha-bau was its priest.

Of Seth so much was written by Plutarch and others that the position and attributes of the god have been completely obscured, and that obscurity has been increased by many of the authors of modern books on Egyptian religion. The position of Seth in early times is clearly indicated in the Pyramid Texts of Pepy and Merenra (see Ancient Egypt, 1928, p. 8 seq.), where Seth is the Giver of Fertility and is sacrificed for the good of his people, an aspect not generally recognised by the writers on Egyptian religion. [Seth was god of the Anu.—F. P.]

In the case of Anubis the confusion arose, as with Seth, in that confused period, the New Kingdom, when new and foreign ideas began to infiltrate into the more primitive cults. The theologians, probably the priests of Heliopolis which was the centre of all theology and speculative religion, re-arranged the pantheon, paired off the deities who had no consorts (e.g. Ptah with Sekhmet), or invented goddesses for bachelor gods (e.g. Amont and Amon). They also identified one deity with another, like Sekhmet and Bast, though originally the two were quite distinct. The sun’s journey through the other world is another example of the theological attempt to fuse unconnected ideas together; here the priests sent the sun through the other worlds of various parts of Egypt; the clumsiness of the arrangement is seen by the fact that the morning star, heralding the dawn, appears three times in the course of the night’s journey.

The identification of one god with another is responsible for the confusion which existed in late
times between the two jackal gods, Anubis the god of Death, and Wep-wawut, the local god of Siut. The confusion between the two is most marked from the New Kingdom onwards, though it began earlier; but even in the Middle Kingdom Wep-wawut was not the same as Anubis; he had his temple at Siut and functioned within his own district, whereas Anubis belonged to every part of Egypt.

4. The priestly insignia of Seker-kha-bau so obviously refer to Anubis that it is worth while to examine the priestly titles in the inscriptions. Of the four deities mentioned, Seker-kha-bau is prophet (𓊢𓊳) of Seshat and of the fetish of Oxyrhynchus, and he holds the rare title of ⲣ Ⲫ Ⲳ ⲱ ⲫ in the cult of Seth; for the worship of each of these three deities he holds one title only. But for the cult of Anubis he holds two offices; consequently it is only logical to infer that he was an important personage in the service of that god. The priesthoods occur in a group together on the back of the false door, on one of the side panels, and on the lintel. On the other side panel there are civilian titles only, with the exception of the priesthood of Seshat; and on the drum there are again only civilian titles.

The two priestly titles referring to Anubis are ⲇ ⲧ Ⲧ ⲫ Ⲥ ⲥ ⲩ ⲧ Ⲩ Ⲫ ⲩ ⲫ ⲩ Ⲩ Ⲫ ⲩ ḫ ⲩ ḫ ⲩ ḫ ⲩ “Builder (lit. axe-man) of Anubis, Chief of the Sacred Land”; and ḫ ⲩ ḫ ⲩ ḫ ⲩ ḫ ⲩ ḫ “Ruler of the divine shrine of Anubis”. Both are rare titles. I cannot agree with Professor Sethe (see below, p. 11) in dividing the second title into two parts, as the division leaves the epithet of Anubis unconnected with any priesthood. Arranged as I have given it, the title makes good sense. Sethe basing his reading on the sealing in the tomb of Neterkhét (Garstang, Mahasna, pl. viii, 1) but in my opinion the word there reads ḫy, as he himself suggested, this being an epithet of the god. In the early jar-sealings the name or figure of a deity is often set vertically between enclosed names of kings (Petrie, Royal Tombs, pl. xxii, 179; Garstang, Mahasna, pl. ix, 5b, where the god’s name is ‘Ash, not Hor-akhti).

The two priestly titles are not only rare—the axe-man title is known only in the Old Kingdom when wooden architecture was in use—but the combination with Anubis is unique in the case of the axe-man, and the Ruler of the Anubis shrine occurs in only one other tomb, that of Y-em-hotep (L. D. ii, 112). 5. In the present state of our knowledge of Egyptian burial customs it is impossible to say whether the peasants received burial in the Sacred Land, or whether that area was reserved for nobles only. If the former were the case, the burials found in any given cemetery must have consisted almost entirely of peasants, as the peasantry always greatly outnumber the nobility in any country. Yet the records of any modernly excavated cemetery, e.g. Saqqara, show that this was not the case. If, on the other hand, the peasantry did not practise inhumation, what became of the bodies? The scarcity of timber in Egypt precluded cremation; the sand dries but does not destroy the corpses; the only alternatives would be the river with its crocodiles, or exposure to birds and beasts of prey. The jackal and the vulture are the most prompt and active of such scavengers on dry land, the crocodile being equally prompt and active in the water; and it is noticeable that all three creatures were deified. The reason for identifying the jackal more than the other two with death can only be surmised. I suggest that the reasons were that it is a nocturnal animal, and that it is also extremely liable to rabies, which last would make it a terror in the eyes of the people. Anyone who has lived in a country where mad jackals are not uncommon will understand the panic which they inspire. A rappid jackal will attack a human being with ferocity and, owing to the carrion on which it lives, its bite is often fatal even when the creature is not diseased. The combination of nocturnal habits and of almost certainly fatal bites would make the jackal an obvious emblem of death. Another fact which in Egypt connects the jackal with death is its habit of sitting on the tombs.

As death is the inevitable end of every life, it seems strange, at first sight, that the King should have a special God to bring that end to him. But if no King were ever allowed to die a natural death, an executioner must have been appointed when the allotted span of the royal life had run. In all places where the divine King is put to death, the sacrifice can only be consummated at the hands of a specially appointed priest; otherwise to kill the King is worse than murder. The tribes of the Nilotic Sudan have, until recent times, practised the custom of sacrificing their incarnate Gods, and in every country where the rite is practised the victim is warned beforehand and an official executioner performs the sacrifice. Bruce (Travels to discover the Sources
of the Nile, iv, 459 seq., ed. 1790) makes this quite clear: "There is one officer of his (i.e. the King's) family who alone can be the instrument of shedding his sovereign and kinsman's blood... nor is any guilt imputed to him however many of his sovereigns he has thus murdered." This statement explains two facts connected with Anubis. The first is that when the name is determined with the sign of a child it means a prince or princess, in other words one of the King's own family; and second, that in the New Kingdom and later, Anubis is credited with being the son of Osiris, and according to Erman (Z.A.S., 1910, p. 93 seq.) the name Osiris may mean the Occupier of the Throne. If, then, Anubis was the appointed messenger of death and possibly the executioner of the divine victim, his place in the pantheon of royal gods becomes clear; he is the death-god of the King. Such a suggestion is substantiated by the customs of the Shilluk, where, until the very end of the last century, the ororo or king-killer was always a member of the royal family, and also announced to the King that his time had come (Seligman, Pagan Tribes of the Niletic Sudan, p. 91). In other words, the Shilluk kept up the Anubis custom till modern times.

The significance of Seker-kha-ban's collar lies in the combination of Anubis and the number of ankh-signs. If my theory is correct and Anubis was the messenger to announce death to the predestined victim and to consummate the sacrifice, masking would probably be part of the ritual. I have already pointed out (Ancient Egypt, 1928, p. 8) that the Pyramid Texts of Pepy and Merenra show that the King was sacrificed as a fertility victim. As the Pyramid Texts were already corrupt from centuries of copying and as they also indicate to the King a way of escape from his fate, it is evident that the custom was even then extremely ancient.

Frazer has proved that the sacrifice was often consummated at the end of a term of years, usually seven or nine. The story of Menkaure shows that in Egypt the length of the term was seven years. The story is recorded by Herodotus (Book ii, 133). Menkaure, a Pharaoh of the IVth dynasty, was warned by an oracle of Buto that he would reign for six years and die in the seventh. As an oracle when first given has always to be interpreted by the priests, there is confirmation of the story in the account by Diodorus (iii, 6, 3) of Ergamenes, a king of Ethiopia, who was told by the priests that his hour had come. He had no intention of being sacrificed, he therefore assembled his soldiers, marched on the temple and killed the priests. In the case of Ergamenes the priests had decided on his death on account of his showing the first signs of old age, but the story of Menkaure indicates that in ancient Egypt a term was set to the reign, and that this term was seven years. There are two confirmations of this story. In a sculptured scene in the temple of Ne-user-re, of the Vth dynasty, Anubis presents the Pharaoh with seven ankhs, thus symbolizing the seven years of life then being allotted to the monarch. It should be noted that in the IVth dynasty Menkaure had six years of life and died in the seventh, while in the Vth dynasty Ne-user-re had seven complete years of life. A case parallel with Menkaure is that of Tut-ankh-Amen, who also was preceded by a blasphemous King, "the criminal of Akhetaten," but himself returned to the old religion and its rites and customs; he reigned six years and died in the seventh. Again, in the XXVIth dynasty, according to Herodotus (Book ii, 161), "Psammis reigned only six years over Egypt, and made an expedition into Ethiopia, and shortly afterwards died."

It seems, then, that the custom of sacrificing the royal god at the end of a term of years was known in Egypt from an early period. When the custom relaxes, the King can be represented by a substitute; this was probably the case in Egypt in the greater number of reigns, and it was only for certain Kings that the law was enforced. The rigorous insistence on the death of Menkaure may have been due to the fact that his two immediate predecessors, Khufu and Khafra, had "closed the temples and forbidden the sacrifices." If the sacrifices included the killing of the royal and divine victim, the action of the two Kings is quite understandable, but the action of the priests on the accession of a pious and retrogressive Pharaoh is equally understandable; they insisted on the fulfilment of the religious law after the lawlessness of the two previous impious monarchs. The "criminality" of Akhenaten may have been of the same type as that of Khufu and Khafra, and his successor paid the same penalty as the successor of the impious Kings of the IVth dynasty.

Anubis was the personification of Death, and it was therefore appropriate that he should indicate to Ne-user-re the length of life allotted to the King. His priest, masked with a jackal's head, was the dread messenger announcing the immediate
approach of the final scene. The summoner, who called the incarnate God to become the chief god of the next world, had no temple, for there was, then as now, no means of propitiating death. Prayers and sacrifices cannot placate the King of Terrors, “mortal gods and gods alike we must die.”

The collar of Seker-kha-bau, doubly priest of Anubis, thus takes on a sinister significance. The jackal figure and the six ankh-signs combine to show that the collar refers to the six-year period of Menkaure, and the combination can only be explained by the scene of Anubis and Ne-user-re. The “Great Name” of Seker-kha-bau shows also the priest’s connection with the dead through the local Memphite god of the other world.

The question arises, if Seker-kha-bau were the summoner was he also the executioner, for I have already pointed out that the royal victim must be sacrificed, not murdered; and the sacrifice must always be performed by a priest. So little is known of the early religion of Egypt that it is quite uncertain, though not unlikely, that the summoner and the sacrificial priest were one and the same. If this is so, the titles of the priests of Anubis assume a meaning and significance which reveal the primitive religion of Egypt in an unexpected aspect.

If, as Erman has pointed out, the name Osiris means simply the Occupier of the Throne, the inclusion of the Death-god in the Osirian Cycle is logical, for one of the central doctrines of the Osirian faith was the death, by violence, of the god. Seth’s rôle of executioner is also in accordance with the modern Shilluk custom, for Seth was full brother to Osiris and was therefore the obvious candidate for the office. In primitive societies the King-killer was probably the successor to the throne, and in the legend Seth was aiming at the crown. Seker-kha-bau has among his priestly offices a title which is unexplained, but which refers to Seth.

I suggest then that in Seker-kha-bau must be seen the priest of Anubis who, masked as Anubis, announced to the king that the day of death was fixed and that also, as the official representative of Seth, he consummated the sacrifice.

6. Though Anubis has several epithets, I propose to discuss only three of them here.

(a) \( \overline{\text{imj}} \) \( Wt \). This epithet has been variously explained, but to my mind the explanations leave much to be desired. The rare epithet \( \overline{\text{Wtj}} “ \text{He of Ut} \” \) (see p. 11; also Garstang, Mahasna, pl. viii, 1) should be considered in this connection. The determinative is usually called the city-sign, and therefore a “city of Ut” has been invented. \( Wt \) has also been called the “city of bandaging”, though it must be fairly obvious that no such city ever existed. The so-called “city-sign” originally denoted an enclosed space, which may have been inhabited or merely cultivated, hence its use in the names of farms and fields. It was not a town with streets and houses in our sense of the word; it was not necessarily even a village or a hamlet. But the word \( Wt \) is well-known as the term for an oasis; hence the epithet can be translated “He who is in” (or “from”) “the Oasis”.

(b) \( \overline{\text{inj}} \, \overline{\text{sh}} \, \overline{\text{nt}} \). “He who is in front of the shrine of the God”. In this title the shrine is always represented from the front, and in detailed examples the door is shown. It is a lattice-work shrine, and the meaning must be studied in connection with another latticed shrine of Anubis. Late representations of Anubis show a jackal couchant above a low flat structure which looks like an altar. The early form of this building is seen on the sealings from the Royal Tombs of Abydos, where the roof is made of lattice-work, like the walls, and is in the form of a jackal (see p. 9, fig. 1). If Anubis is regarded as connected with the Pharaoh only, this shrine must have a special royal significance. Modern Africa still practises certain customs which occasionally throw light on ancient religious rites, and this is a case in point. Among the Shilluk of the Upper Nile Valley the method of killing the king was to enclose him in an air-tight hut, specially built for the purpose, and let him die slowly of suffocation. After some months the death-hut was “broken down by the ororo, a grave was dug and the bones of the king were placed in it wrapped in the skin of one of the sacrificed oxen. A hut was built over the grave, and one or two others put up within the enclosure for the attendants on the new shrine, which had thus arisen” (Seligman, Pagan Tribes of the Nilotic Sudan, pp. 91, 92). The hut-shrine, with the figure of the death-god cunningly woven into the actual structure, shows very clearly that it was a death-hut, and suggests that the royal victim was put to death, like the Shilluk King, in a special building. The euphemism for the King’s death, “The two great Doors are shut,” may refer to that early time and the closing of the doors of the
7. The combination of Horus and Anubis is again strong evidence that Anubis was in origin a purely royal deity. The falcon was the totem of the Pharaoh from the time of Narmer onwards. His four standards on the slate-palette are two falcons, a jackal, and the placenta or birth-sign. On the mace-head the standards are arranged in a different order, jackal, birth-sign, and the two falcons. If my interpretation is correct these four standards, which were the personal standards of the King, show his birth (the placenta), his death (the jackal), and his two totems (the falcons), one totem being for his career on earth, the other being the one into which he entered at death. The belief in the entry of the King into a falcon at death seems to be expressed in the words used to announce the death of Amenemhet I, “He has flown up to the horizon to join the Sun.” And that the King had a falcon-totem for his lifetime is shown by the human-armed falcon on Narmer’s slate palette, by innumerable instances of the falcon-names of Kings, and by the words applied to Senusert I, “The falcon has flown away.” In the case of Narmer, I consider that the standards were carried two by two, the standards of birth and death having each its respective totem beside it.

CHAPTER II.

OTHER EARLY DEITIES.

8. Bast. The title of Zefau “Great One of bst” cannot refer to the goddess, whose name in the Old Kingdom (see Mariette, Mastabas, p. 70; Petrie, Medium, pls. xvi, xx, xxi; British Museum, No. 1324) is spelt $\text{b}$ $\text{st}$ (abbreviated to $\text{b}$ $\text{st}$ in later times). Bast was a cat-goddess, and the pot of perfume, which seems to be an integral part of her name, suggests either that the original animal was a civet cat or that the perfume was of that strong and rather acrid variety beloved of cats. The spelling out of the name appears to indicate that the early pronunciation was $\text{b}$ $\text{st}$, altered later by metathesis. The meaning would then be “She who causes to be a soul”, the “Soullifer”, if I may be permitted to coin a word. This name is parallel with the causative epithet applied to another deity $\text{h}$ $\text{b}$ $\text{k}$ “He who causes to be pregnant”.

Nothing is known of the ritual of Bast except the description by Herodotus (Book ii, 60) of the orgiastic ceremonies and dances held in her honour in the Delta. It is possible also that the perfume, with which she is so closely associated, had an intoxicating quality, and that her votaries like those of Bacchus felt themselves etherealized by the deity. This would explain the account given by Herodotus. The temple of Bubastis which so roused the enthusiasm of Herodotus, yielded on excavation no information as to her nature or rites; but as the local deity she undoubtedly united in herself the powers of life and death, fertility and barrenness, within her own district.

In the fusion period Bast was identified with Sekhmet, who was a lioness, not a cat. When the theologians invented the marriages of gods, Sekhmet was paired off with Ptah, but Bast was always a deity without a consort. In the late period both goddesses were represented as enemies of snakes, but this is an attribute which should belong to Bast only. There is no record in Egypt, ancient or modern, of any kind of connection between lions and snakes; on the other hand, in the country parts of modern Egypt cats are still regarded as snake-killers, and are often kept for that purpose. In the religion, which after all only reflected earthly ideas, the divine cat was the destroyer of evil symbolized as a snake.
The title "Great One of bst" is very rare, only two persons being recorded as the holders, Zefau and Ka-pu-Ra (Mariette, Mastabas, pp. 252, 275), both of Saqqara. The object which determines the word bst is the head of a lioness; this would seem to bring it into relation with the two feline goddesses, though the spelling with —— shows that it is not identical with the name of Bast. The object appears to be a playing piece or chessman of the type which usually stands for the syllable ṣḥ. The title may belong to a civil office; the Wörterbuch gives only the vague term "Schatzbeamter" as the translation, but this is only because in the list of titles it precedes, or is written parallel with, the title ṣḥ pr-hd, which was the highest office in the Treasury. I suggest that the object represents a weight, probably of small size for weighing precious metals. Among ancient peoples the primary weights and measures were often regarded as sacred and were kept in the temple as the safest depository of the period, and there guarded by the priests. But in less troubled times the guardians might well be laymen. In the 5th dynasty conditions were settled, and it is quite possible that in Memphis, the capital of the country, a civilian guardian might be appointed; but the sanctity of the object would be indicated by the form, which placed it under the special protection of the lioness-goddess of the city.

9. Hathor. The goddesses most frequently mentioned in the tombs of Saqqara are Hathor and Neith. Both were deities whose cult was widely spread, and lasted so long that their original aspect is almost lost; this is particularly the case in regard to Hathor. In later times she is fused with all other goddesses, especially with Isis as the Great Mother. But her position was comparatively humble in the Memphite nome, where she was identified with the Lady of the Sycomore. This title was entirely local in the Old Kingdom, though later it spread with her cult to other parts of Egypt. That she was worshipped elsewhere in the Old Kingdom under other titles is proved by her epithet at Dendera of "Lady of the Pillar" (Mar. Mast. p. 312 for name of pillar). As Lady of the Sycomore her priesthood at Memphis in the Old Kingdom consisted of women only; as Lady of the Pillar women were predominant in her service. There is only one record of a priesthood of hers as Lady of Cusae, and that is held by a man.

The explanation usually given of the name of the goddess is the literal translation of the hieroglyphs in which it is written, ḫḥ "House of Horus". The attempt to prove that it means "Mother of the unborn Horus" is surely untenable. Had the Egyptians wished to call her the pregnant goddess, they would have done so openly and would not have taken refuge in a modest paraphrase. "Horus in the womb" (Hnti-ḥḥ) was a popular god at all times, particularly in the Middle Kingdom, and our modern ideas of propriety and modesty would not have affected the ancient Egyptian epithets for a goddess. The translation House of Horus means nothing as it stands, and should be abandoned and another translation sought.

Barton (Semitic and Hamitic Origins, p. 168, ed. 1934) has attempted this when he suggests that the words are really ḫḥ-ḥḥt, translated as "She of the lofty House". But here again the translation is inadmissible, as ḫḥ means "above, over", not "lofty". The Egyptian word for "lofty" is ḫ. There is, however, another possible explanation of the name Hathor, to which I would call attention. The T in the middle of the name is not explained by either of the derivations proposed. The Egyptian △ survives into the Greek and Coptic transcriptions only when it is a root-letter; when it is merely the feminine termination, as in the word ḫḥt (△ △ = △), it disappears unless supported by a pronoun. The fact that the T remains shows that a pronoun was originally there; and that it could only have been the pronoun of the first person singular. This pronoun was often omitted in writing and probably in speaking, as well, but its presence would preserve the sound of the feminine termination. The first part of the name would then read "My house". If the second part of the name means, as Barton has pointed out, some form of the adverb ḫḥt "above, over", the name can be reasonably translated as "My house is above"; or as the feminised form ḫḥrt means "That which is above" and was commonly used as a term for the sky, i.e. the vault of heaven, the translation would then be "My house is the sky", and would account, as nothing else does, for the identification of Hathor the cow with Nut the sky. The identification of Nut and Hathor has always been a puzzle, yet they were very closely connected. At Memphis Hathor is the Lady of the Sycomore, whose function was to provide the dead with food in the regions of the other world,
but in later times it was Nut who had charge of the dead. Hathor was certainly a cow-goddess from the earliest period, for on the slate palette of Narmer she is represented, as she was represented throughout the whole course of Egyptian history, with a woman’s face and cow’s ears and horns. But the heavenly cow, who gives birth to the sun and moon, may be either Hathor or Nut indifferently. Even as late as Ptolemaic times the identification of Hathor and Nut is indicated by the figure of “Nut the Unknown” in the Hathor temple of Dendera.

In early times there seems to be no indication that Hathor was a Mother-goddess; nor, until she was fused with Isis, had she a consort. She was not specifically connected with water or with agricultural fertility, that is to say with sowing and reaping, which may mean that she belongs to a pre-agricultural period, to the times of animal husbandry. She would thus be one of the primitive goddesses, and though her name may be Egyptian she could be fused with both native and foreign goddesses. Her identification with Ashtoreth-Karmein, the cow-horned goddess of Babylonia, has been noted by Müller, *Asien und Europa*, p. 313.

10. Neith. Neith is another goddess who, in the Old Kingdom, was served by women only. Her cult was not so popular in Memphis and the South as that of Hathor, probably because she was essentially a goddess of the North. She had, however, an important shrine in Memphis. Her title, Neith, “North of the Wall,” fixes its topographical position in relation to the shrine of Ptah, which was South of the Wall. This position was possibly arranged as being appropriate to a goddess of the North. Neith has two emblems, both of which were regarded as sufficiently sacred to be set on the sign of divinity (in the 1st dynasty they are set on a pole; see Petrie, *Royal Tombs in, Front., ii, pl. x, 2*). The emblems are: (a) crossed arrows, and (b) two bows in a case (*Ancient Egypt*, 1921, p. 36); these indicate that she was a goddess of the chase. The earliest examples of the emblems are from the royal tombs at Abydos and Naqada, and occur in the name of the queen, Neith-hotep. The meaning of the name is at present unknown; it appears to be the same as that of the crown of Lower Egypt, which was itself a divinity.

11. Rui. The name rui appears to be equivalent to the later rwrjt. It is now well established by Erman, Sethe, and others that the duplication of a sign is not necessarily the duplication of the syllable in reading, but may represent the dual form. That being the case, the reading here would be *rwj “The two lions”, not *rj which is the word for a pig. The feminine form of this name is therefore not *rwrwj* as written, but *rwtj* as Naville noted (*Sphinx*, 1902, p. 195). The meaning of the word has, I think, been discussed only by Naville (op. cit.), who, however, did not recognize the *j* as the feminine ending, but suggests that the *tj* is a *nisbe-form*, and that the word is an epithet of the sphinx.

If, though, the word is really a dual, the meaning may become clear in connection with the hitherto unexplained expression *rwtj wrijt*, which is said to refer to the great double gates of the palace or a temple. It has been inferred that the dual form of the word is due to the fact that the Egyptians used folding or double doors, and that therefore the word for door would naturally be in the dual. This seems hardly likely, for in the earliest example of the word for a door (on the slate palette of Narmer) the word is in the singular. It seems more probable that the word should be taken literally, and that *rwj* or *rwtj*—the two lions or two lionesses, in later times two sphinxes—were the images of animals who acted as guardians of the gate, one on each side of the entrance. A guardian of the door or gate is often a deity (cf. the god *Janus*), and it is therefore not surprising to find a priest of the cult.

One of the earliest examples of the lion or lioness as gate guardian is on a clay sealing of King Zer of the 1st dynasty from Abydos (Fig. 1). Some years ago Professor Petrie drew attention to the connection in this sealing between the shrine and the guardian lion with the triple bar on its back; he took the bar to be the barrier in front of the shrine. A similar lion or lioness with a single bar on its back (Fig. 2) occurs on the wooden panel of Ra-hesy,
hence the masculine word *rwy*; the want of a mane suggested to the later Egyptians that the animal was female, and the feminine form *rwtj* was adopted.

An important point in regard to the lion-guardian is the form of the shrine on the clay sealing. It must have been made of lattice-work, and the upper part represents the jackal god, Anubis; the ears, snout, and paws are over the front, the body of the animal extends over the whole edifice, and the tail hangs down to the ground at the back of the shrine. There are three examples of this shrine from Abydos, all of the same period (Royal Tombs, ii, pl. xvi, 114, 116, 117); only one shows the entire building, the others are incomplete but the characteristic tail is quite clear. This is a totally different type of shrine from those of the same early period represented on the slate palettes, mace-heads, sealings, and ebony tablets. It is obviously a special building connected with the god of death and presumably with the King in his aspect as a god.

The form of the shrine, as shown on the sealing, may explain the reference to Anubis in the Book of the Dead (ch. lxxvii, 26), "He who is high on his db," a word which is rendered "tomb" or "edifice", or else left untranslated. I have given above (p. 6) a view as to the use and meaning of the death hut.

The name of Ruti occurs three times in the Pyramid Texts, the meaning in each instance being obscure. "Thy ennead is thine, O Atum and Ruti. Those who make their two gods and their two bodies are Shu and Tefnut" (W. 447). "Verily, the ka of this N. rises to the god, and brings him to Ruti and . . . him to Atum" (N. 2081). "Great is the honour of N. in the house of Ruti. Is expelled the fault belonging to N. by the expeller of evil in the presence of Khenti-irti in Letopolis" (N. 2086).

In the Book of the Dead the references are more frequent, but it must be remembered that in the New Kingdom much of the religion, which originally belonged to the Pharaoh alone, had become democratized and was used by lesser folk. The papyri of the XVIIIth dynasty (Nu and Nebseni) show a connection between Ruti and the idea of life after death. "O Atum, coming forth as the Great One of the waves, glorious like Ruti, make for him commands to the crew of Ra in the evening that the Osiris NN may live after death like Ra every day" (ch. xxxviii, B. 2). "I go in, I go out, my throat is not slit. I go down to the Boat of Maat. I mount (?) up to the Manzet-boat in the retinue of Ra at his side in his horizon. I live after I am dead every day. I am strong (s’t) like Ruti, for I live after I am dead" (ch. xxxviii, A. 7).

Ruti is also connected with the *nemes*-cloth, the striped head-dress of the Pharaoh. The root meaning of the word *nms* is not known, therefore the exact explanation of the word in the masculine form as applied to the royal head-cloth, or in the feminine form (*nms*) as applied to a vase, is still to seek. There appears to be a connection between the *nemset*-vase and the cobra which suggests an original connection of the vase as well as the cloth with the King.

The references in the Book of the Dead are as follows: "Says Ruti, who is chief of the guardians of the House of the Nemes-cloth, who is in his cavern, Why dost thou turn back to the limits of heaven? Behold, thou art noble (s’h) in thy existences of Horus. The *nemset* is not against thee" (ch. lxxviii, 21). "Horus repeats to me that which his father Osiris said to him in the season and days of burial, when thou gavest to me the *nemes*-cloth. Says Ruti to me, Thou goest and comest upon the road of heaven, those who are in the ends of the horizon see thee. . . . Verily, he who is high on his shrine has bound for me the *nemes*-cloth at the command of Ruti. . . . I am high on my shrine, Ruti has bound the *nemes*-cloth on me" (ch. lxxviii, 21, 3, 26).

The Negative Confession shows that Ruti was not a local deity, for he "comes forth from heaven" and not from a specified city. This also suggests that he belonged originally to the cycle of royal gods and not to a single town or to the people.

12. Seshat (also transliterated as Sefekt-abui). Sethe (p. 11) calls this deity the Goddess of Architecture. At the early period to which Seker-kha-bau belonged, architecture in the present sense of the word was still in its infancy. It would be better to call her the Goddess of Building, as this epithet would cover all types of building from the most primitive reed-hut to the most stately stone temple. The hieroglyphs on the false-door of Seker-kha-bau show that at that period so great and important a god as Seth had only a lattice-and-thatch shrine for his worship; temples copied in stone from reed and wood prototypes were only just beginning. Seshat must therefore be the deity of hut-building, and this is, I think, shown by the hieroglyph of her name (see *Sag. Mast.* I, Pl. XXXIX,
Seshat

CHAPTER III.
TRANSLATIONS AND INSCRIPTIONS IN
SAQQARA MASTABAS I.

By Kurt Sethe.

[Titles of office were not tabulated and studied all together until 1926, twenty-one years after these chapters were written. From this study, consistent equivalents of hieroglyphs and translation have been worked out and indexed in Ancient Egypt, 1924-7. These values have been added here in square brackets.—F. P.]

13. TOMB OF KHA-BAU-SEKER. Pls. I, II.

Name. \( \overline{\text{ibjibw-Prth}} \) read \( \text{ibjibw-Skr} \) "The glory of Seker shines". Analogous names are

\( \overline{\text{ibjibw-Rth}} \) "The spirits of Ra shine", \( \overline{\text{ibjibw-Rk}} \) "The beauties of Ra shine". The little name is the name of an animal \( \overline{\text{nhfs}}, \) which is regarded by Miss Murray, judging by the determinative, as a mongoose. The technical term for the "little name" of a person is not \( \text{rn} \overline{\text{sr}}, \) but appears (by the variant \( \overline{\text{nhfs}} \) here given) to be \( \text{rn} \overline{\text{nd}}. \)

Titles.

1. \( \overline{\text{hrpw nhr w'n brk}} \) "[Controller of the land] of the South and North".

2. \( \overline{\text{hrpw ntr}} \) "[Controller of the hoe] women".

3. \( \overline{\text{hrpw ntr}} \) "[Controller of the weaving] women".

4. \( \overline{\text{hrpw ntr}} \) "[Controller of the hoe and knife flaking] women".

5. \( \overline{\text{hrpw ntr}} \) "[Controller of the registered] workmen".

6. \( \overline{\text{hrpw ntr}} \) "[Controller of the registered] workmen".

7. \( \overline{\text{hrpw ntr}} \) "[Controller of the registered] workmen".

8. \( \overline{\text{hrpw ntr}} \) "[Guard of the cattle]".

9. \( \overline{\text{hrpw ntr}} \) "Prophet of the goddess of architecture".

10. \( \overline{\text{hrpw ntr}} \) "[Guard of the reeds]" (see Aeg. Inschr. von Berlin, i, t. 31; Garstang, Mahasna, pl. viii, 2.

11. \( \overline{\text{hrpw ntr}} \) "[Guard of the reeds]".

12. \( \overline{\text{hrpw ntr}} \) "Prophet of . . ."

13. \( \overline{\text{hrpw ntr}} \) "[Guard of the reeds]".

14. \( \overline{\text{hrpw ntr}} \) "[Guard of the reeds]" of the temple of Seth".

Dale, HIrd dynasty.
Family. Wife ird hni-swet Nhfr-Hatr "The [courtier], Beautiful is the peace of Hathor". Her "little name" is  Tepes.

Stele of the man, Pl. I.

The lower part of the stele is occupied by a long list of offerings, which differs completely from the usual lists of the IVth-VIth dynasties. Note the determinatives which occur under the name of each object, and the generic title which stands above the several groups.

In the centre under the panel are the names of woven fabrics. These are divided into three kinds, idmj "Red stuff", sfr-fabric" and sfr-fabric." Then follow lists of various vessels and household gear. To right and left are identical lists of beer, wines, fruits, and grain.

Pl. II. On the architrave are the name and some of the titles of Khn-bau-Seker (see p. 11).

On the stele of Nefer-hotep-Hathor the list of offerings is shorter than that of her husband, but gives several variants. Of these the most interesting is, that whereas on the stele of the man various vessels are represented under the headings and , here they all appear under the one heading  sjpt.

Name. K-n-hswt "The ka is in favour". Compare the analogous names .

Titles.
1. s-mr-f A priestly title which is also known as an epithet of Horus.
2. (reading doubtful) "Sculptor".
3. imy pry "He who is in the two Houses". An engineer's title borne by the High Priest of Memphis as "the great Leader of the artisans", and also by the "chief of all the [carpentry and brickwork] of the King".

15. Lintel from the tomb of Khuyu-en-Ptah.
Pl. III, 3.

Name. kfrw-n-Ptah "He whom Ptah has protected". Compare the analogous names .

The same person occurs in an inscription in the Wadi Hammamat of the time of Pepy I (see L. D. ii, 115 b).

Pl. III, 4.

Name. Htp-bjt-hrj A name which contains the word 'bjt', an epithet of the sun-god, which in later times is found only with the name . Compare . "bjt, irjw-n-bjt, n-sc-bjt. The form with bjt and hr, which occurs in the name  is very ancient and is found even in the 1st dynasty (Royal Tombs, ii, pl. xxvi, 70).

Titles.
1. s'h irj-Nhu "Judge belonging to Hierakonpolis".
2. \( \text{hm-nt} \) "Prophet of the goddess of Truth".

**Date.** A man of the same name and with the same titles lived under the Sixth dynasty (see Mariette, Mastabas, p. 340).

In the inscription the formula should read  

17. **Tomb of the Sheikh el Beled.** Pl. III, 5.

**Name.**  
\( \text{K'} \), a common name in the Old Kingdom.

**Title.** "Chief lector-priest."

The inscription is on the lintel of the great granite false-door.

18. **Tomb of Ptah-hotep desher.** Pls. IV, V.

Son and successor of Ptah-hotep desher.

**Titles.**

1.  
2.  
3.  
4.  
5. \( \text{imj-r iswj} \) (without \( \text{on architrave} \) \( \text{ni-swt} \) "[Intendant of the registers] of the two store-houses of the King's [favourite]".

6.  
7. "[Intendant] of the usekh-hall".

8. "[Intendant] of the two granaries".

9. "[Intendant] of the Treasury".

10. "[Intendant] of the six Great Houses" (higher courts of Justice).

11. "[Intendant of the registers] of that which is under seal".

12. \( \text{imj-r iswj mrt} \) "[Intendant of the register] of the two houses of the slaves".

19. **Tomb of Ptah-hotep desher.** Pl. VI.

**Name.** Ptah-hotep dšr Ptah-hotep the Red. For other colour designations, compare "S\'w\'w km Sabu the Black.

**Titles.**

1.  
2. “[Leader]”.

3. "[Intendant of registers of the Double House of the royal Favourites]."

4. "[Intendant of the Court of Six]".

5. "[Intendant of registers] of the Double House of things under seal".

6. "[Intendant of registers of the Double House of the royal Favourites]."

7. "[Intendant of the Court of Six]".

8. "[Intendant of registers] of the Double House of things under seal".

9. "[Controller] of the usekh-hall".

**Date.** First half of the Sixth dynasty.

On the architrave above the doorway of the outer chamber is an inscription in two lines, containing a formula for the dead and the titles and name of the deceased: "May the King be gracious and grant, may Anubis be gracious, he who is in front of the divine hall, he who is in [the] Lord of Ta-zoser, he who is on the Hill of the Slug, who is in front of Sepa (Hipponon), that he may be buried in the necropolis in the western desert, at a very good old age, as one honoured by the great God," (here follow the titles) "Ptah-hotep the Red".

On the drum of the door is the name of the deceased, preceded by his principal title: "[High Court] judge and Vezir."
CHAPTER IV.
By Kurt Sethe.

20. Tomb of Ptah-hotep II. Pls. VIII-XVII.

Titles.
(a) General titles.
1. ḫrj-p’t. "Leader",
2. ẖtj." [Owner].
3. ḫrj P "Belonging to Buto ".
4. šd’t (?) bilj " [Royal sealer].
5. śmr w’tj n mrwt " [Companion peer beloved].
6. mdw rḥt " [Spokesman of the rekhryt].
7. hṛp wṣḥt " [Controller] of the palace ".
8. inkmt.
9. (var. with ḫrj ššt n ni-ṣwt " [Over the secrets] of the King ".
10. ḫrj-ššt n wḏ-mdw nti ni-ṣwt " [Over the secrets] of all commands of the King ".
(b) Juridical and administrative service.
11. sḏ tḥtj ḫl " [High Court] judge and Vezier ".
12. imj-r ḫt nḥt n ni-ṣwt " [Intendant] of all the works of the King ".
13. imj-r ššt ‘ ni-ṣwt " [Intendant] of the scribes of the archives of the King ".
(c) Treasury service.
14. imj-r ṭḥt nḥt nti ni-ṣwt " [Intendant] of all the things of the King ".
15. imj-r šnwtj " [Intendant] of the two granaries ".
16. imj-r ḫpr jdwj " [Intendant] of the two White Houses," i.e. the finance department.

18. imj-r ḫbr ni-ṣwt " [Intendant of the pure place = tomb] ".
19. imj-r ḫpr jdwj " [Intendant] of the two Houses of Gold ".
20. ḫbr ni-ṣwt " [Intendant] of the royal favourites ".

Family.

sḏ šnwtj tḥtj fṯḥ ni-ṣwt " ḫrj ḫwjt " His eldest son, who is loved by him, the First under the King, Akhety-hotep ". For the reading of the name, see p. 12. Probably the same as the Chief judge and Vezier whose tomb was published by Davies (The Mastaba of Ptahhotep and Akkhetep) and whose son, Ptah-hotep, was the overseer of the chief city under Asasa.

Inscriptions.
Pt. VIII, West wall.

Titles and name of the deceased.

Formulae:

On the left: (a) " that he may be buried in the necropolis in the western desert, at a very good old age, as one honoured by the great God ", (the titles), " Ptah-hotep "; (b) " that offerings shall be presented to him on New Year’s Day (the first of Thoth), on the festival of Thoth (18th of Thoth), on the first day of the year (1st of Tybi), at the Ung-festival, on the great festival of Seker, at the rising of Min, on the saz-festival, for Ptah-hotep ".

On the right: (a) Like the left; (b) " . . . that he may go upon the beautiful roads upon which the honoured ones go, in peace, in peace, to every great God."

Pt. XI. East Wall. The registers are counted from below and begin on the left.

Fourth register (from the bottom). A donkey about to be loaded is being dragged to the heap of sheaves, above which is ḫḥ. " phḥt.

Third register, beginning on the left. (a) The sheaves are being thrown on a stack ḳwḥś.
(b) The corn is being trodden out by donkeys on the threshing floor. The discourse of the drivers

\[ i^{\prime} h^{\prime} m^{k} k {\text{ and }} \text{ is comprehensible, though it always occurs with some variations in this scene. (c) The threshed corn is}

heaped up in piles with forks \( t^{b} w^{w} \) "Sweeping together"; cf. Mariette, Mastabas, pp. 181, 289. \( \text{cf. } \text{L. D. ii, 4, and the}

\( i^{k} \) of the inscription of Una. (d) Women

sweeping the corn from the chaff by winnowing:

\[ b^{h} b^{h} \text{ in } w^{b} w w \text{ "Winnowing}

the barley by slaves". Also \( \frac{\text{Snezem-yb and Ptah-hotep.}} {\text{First register (the lowest). Scenes of slaughtering.}

(a) Man in the dress of the upper classes, \( \text{t}^{b} w^{b} \text{Shout } s^{b} s^{b} s^{w} W^{m} n-u^{f} r^{f} \text{ "Priest}

of Sekhmet and [expert] physician, Unen-nefru". He attends the slaughtering to ensure the "purity" of the animals (see Davies, Ptah-hotep). The same

person is mentioned in the tomb of Akhetetep (Davies, op. cit., ii, pl. xviii). For physicians as priests of the goddess Sekhmet, see Erman, Ägypten, p. 467, 1st ed. (b) A man whets a knife.

\[ \text{p}^{d} t^{d} s^{b} \text{ in } s^{s} s^{m} w^{w} \text{ "Sharpening the knife

by the butcher". Another, who is about to cut off the hind-leg of the ox, says to his comrade who holds the leg,}

\[ n^{f} r^{f} w^{w} h^{n} k^{b} \text{ "Hold this as tight as you can".} \]

\( \text{I am doing so," is the reply. (c) An ox is being}

eviscerated \( s^{t} t^{b} \text{ in } s^{s} m^{w} w^{w} \text{ "The taking out of the heart by the butcher".}

(d) A man, who is cutting off a foreleg, says to the

comrade who holds it, \( i^{j} r^{b} k^{b} m^{b} j^{b} s^{m} m^{w} p^{w} \text{ "Pull well, you butcher".}

The answer is \( i^{j} k^{b} r^{b} h^{s} k^{b} w^{t} r^{t} \text{ I am doing (it) so that thou shalt greatly

praise" (see below). (e) A man whetting a knife

\[ \text{p}^{d} t^{d} s^{b} \text{ "The sharpening of a knife". The}

foreleg has been cut off from the ox, \( s^{j} r^{b} i^{n} w^{m} \text{ "The dismemberment of the ox". (f) The same.}

The man who cuts says, \( i^{j} k^{b} r^{b} h^{s} k^{b} \text{ I do (it) so that thou shalt praise".}

(g) Two men cutting up an ox from which the legs

have already been removed. One says, \( s^{j} r^{b} n^{f} r^{f} t^{b} j^{b} h^{n} \text{ "Cut ill, my

comrade". The other replies,}

\[ n^{k} i^{j} r^{b} r^{b} h^{s} k^{b} \text{ "See, I am doing (it) so that}

thou shalt praise".}

PIS. IX, X. South Wall.

Lower register. The villages in Upper Egypt

belonging to the deceased, typified by women, bring their produce to their lord.

\[ \text{int } n^{d} t^{b} h^{r} r^{b} n^{t} n^{t} \text{ in } n^{t} n^{t} t^{b} k^{b} h^{m} \text{ "The bringing of the tribute by the}

villages of the endowed property in Upper Egypt". The villages are named, some after the kings who

had bestowed them on the deceased or his ancestors, some after the deceased himself.

(1) \( M^{r} j^{b} R^{t} \text{ "nh } l^{j} s^{j} j^{b} \text{ " Re' desires that Asesa}

shall live".}

(2) \( n^{f} r^{b} h^{b} w^{w} l^{b} h^{b} k^{b} w^{w} \text{ "Beautiful is the appearing of}

Y-kau-Hor".}
(3) Mrj Hr ‘nh Wsr-k-f “Horus desires that User-kaf shall live.”
(4) Mrj Nḥbšt ‘nh K’k’j “Eileithyia desires that Kakay shall live.”
(5) Nfr ḫwt ʾlk-w-Hr “Beautiful is the praise of Ykau-Hor.” This place is situated in the nome of Heracleopolis (see DAVIES, Ptahhotep, ii, pl. x).
(6) Ṣḥt Pḥḥt “Incense of Ptah-hotep”.
(7) Htt Pḥḥt “Sekhet-corn of Ptah-hotep”.
(8) Ṣḥb Pḥḥt “Chapel of Ptah-hotep”.
(9) Ṣḥt Pḥḥt “. . . of Ptah-hotep”. According to DÜMICHEN (Res., ii, 5) is not a variant of Ṣḥt Pḥḥt as one might suppose. See also L. D. ii, 80b, and DÜMICHEN, Res., i, 2.
(10) Mnʾt Pḥḥt “Wet-nurse of Ptah-hotep”.
(11) Ḥḥpt Pḥḥt “Food offerings of Ptah-hotep”.
(12) Ṣḥb Pḥḥt “Boundary-house of Ptah-hotep”.
(13) Ṣḥb Pḥḥt “Health of Ptah-hotep”.
(14) Ṣḥb Pḥḥt “Life of Ptah-hotep”.
(15) Ṣḥt Pḥḥt “Offering of Ptah-hotep”.
(16) Ṣḥt Pḥḥt “Liberation-vase of Ptah-hotep”.
(17) Ṣḥt Pḥḥt “. . . of Ptah-hotep” (see DÜMICHEN, Res., i, 2; ii, 5).

The deceased receives the procession. Ṣḥt Pḥḥt “Seeing by” (titles) “Ptah-hotep”. In front of him his eldest son is handing him a list of gifts Ṣḥt Pḥḥt “Delivering the writing of the tribute”.

Upper register. Remains of a procession of men bringing gifts to a large seated figure of the deceased. The names which are preserved are:

(1) Ṣḥt Pḥḥt “Ptah-hotep Akhety-hotep. Probably the eldest son of the deceased.
(2) Ṣḥt Pḥḥt “Akhet”.
(3) Ṣḥt Pḥḥt “K’j-bp.
(4) Ṣḥt Pḥḥt “Irj-iš.
(5) Ṣḥt Pḥḥt “N’nh Mn.
(6) Ṣḥt Pḥḥt “Ṣšnw.
(7) Ṣḥt Pḥḥt “Nfr-ṣšnw-f.
(8) Ṣḥt Pḥḥt “K’j-bp.
(9) Ṣḥt Pḥḥt “. . . Ṣšnw . . .
(10) . . . Ṣḥt Pḥḥt
(11) Ṣḥt Pḥḥt “Ṣšš-Ḥḥ.”

A detached fragment of this procession (a man carrying dates) is on Pl. XVII, 6.

Pt. XII. North Wall. The representations correspond exactly with those of the South Wall.

In the lower register the villages of Lower Egypt are figured. The remains of the title of the scene:

. . . Ṣḥt Pḥḥt “Horus makes Aesa to live”, are on a detached fragment, Pt. XVII, 7. The same village occurs in the tomb of Akhetetep (DAVIES, Ptahhotep, ii, pls. x, xii), where it is stated to be in the province of Lower Egypt. Of the others the following names remain:—

(1) Mrj Mʾt ḫssj “Truth loves Aesa”. The same place is mentioned in the tomb of his son Akhetetep as belonging to the Ṣḥt Pḥḥt “Right side of the Harpoon nome” (DAVIES, op. cit., ii, pl. x), and in the tomb of his other son, Ptah-hotep, to the Ṣḥt Pḥḥt Harpoon nome (DÜMICHEN, Res., ii, 15).

(2) Ḫḥpt Wr-k-f (see MARIETTE, Mastabas, p. 396; DÜMICHEN, op. cit., ii, 15). Mentioned in the tomb of his son as being in the Ṣḥt Pḥḥt (DAVIES, op. cit., ii, pls. x, xiii, xv).

(3) Mrj Ṣḥt Mašk K’k’j “The god Sopdu (of the Arabian nome) loves Kakay”.
(4) Ṣḥt ḫḥ ḫr Rʾ “Dad-el-Re’ is heavenly”.
(5) Nfr Ṣḥt Ṣḥt ḫw-Rʾ “What Sahu-Re commands is good”.
(6) Ṣḥt Pḥḥt “Nebes-fruit of Ptah-hotep”.
(7) Ṣḥt Pḥḥt “Place of Ptah-hotep”.
(8) Ṣḥt Pḥḥt “Hennut-food of Ptah-hotep”.
(9) Ṣḥt Pḥḥt “Establishment of Ptah-hotep”.
(10) Ṣḥt Pḥḥt “Ashed-berries of Ptah-hotep”.
(11) . . . Ṣḥt Pḥḥt “Handmaiden of Ptah-hotep” (see MARIETTE, Mastabas, p. 398).
(12) Ṣḥt Pḥḥt “Valley (? of Ptah-hotep”.
(13) Ṣḥt Pḥḥt “Work of Ptah-hotep”.

TRANSLATIONS, PLs. IX–XII
Upper register. On the left the deceased was represented seated before a heap of offerings, the end of which "Kh.t w6k "The best of the table", and the title | šp.rc.t "Limbs of oxen and geese", still remain. Fragments of the list with the words | djw-s'hk "Beer", and the title t' imj t' "Country bread" are on Pl. XVII, 8, 10.

A row of men bearing gifts: "Bringing the offerings for the dead by the [expert] deputy superintendent of the funeral priests, the scribes of the [guard] and funeral priests of the endowed property," etc. The names of the persons are as follows:

1. The eldest son of the deceased, Akhety-hotep.
2. . . . s'b 'd mr šgd hm-k' Nw-hk w "Judge and [conservator of canals, expert servant] of the dead, Nu-hekau".
3. | šgd hm-k' . . .
4. s'b šgd šs šgd hm-k' ltj "Judge and [expert] scribe, [expert servant] of the dead, Ateta".
5. s'b šs šgd hm-k' Ptah-hotep "Judge, scribe, [expert servant] of the dead, Ptah-hotep".
6. s's s' 'htjhtp "Scribe of the [guard], Akhety-hotep".
7. s's s' s'b s's Kdnš "Scribe of the [guard], judge and scribe, Oednes".
8. m šr ỉj-df "I-zefta".
9. s's pr 'kt n njwšw "The scribe of that which comes in for the inhabitants of the town".

PLATE XIV, 2. Offerings being brought to the tomb. Of the inscriptions very little remains. On the left at the top is the name |s; on the left below, are the name | s" Ka-hap " and the title | šmšw ḫjrš "The elder of the [watch-house]"

PL. XVII. Altar. Titles and name of the deceased.

Fragments. Nos. 7, 8, 10 belong to the North Wall (see above).
No. 5 is from the South Wall (see above). No. 4 gives the name of a šmr w'tf Ndm-nhk "[Companion-peer], Nezem-ankh".

21. Tomb of Ateta. Pls. XVIII, XIX.

Name. | šmšw hrš "Atteta, his great name Ankh-ṣrš-ysn".

Titles.
1. ššnšw ist ["Elder of the registers"], see 16 in next list.
2. | imj prj "[He who is in the Double House]"
3. | imj-r 'ḫt "[Intendant] of the palace"
4. ššnšw w-mdw njwšw "[Mayor of the Southern Ten council]"
5. | imj-r wd-mdw njwšw "[Intendant of the dividing words] of the Court of Justice" (or "of the palace")
6. hrš mšw njwšw "[Controller of the royal canals]"
7. hrš hrš "[Controller of the archers]"

See L. D. ii, 1010, and Petrie, Medium, pl. ix.

(8) sš sš njwšw "[Intendant] of all the works of the King"
(9) | imj-r mšt-t. The word mšt-t ["Child-porters"] appears here for the first time in its correct form. Otherwise it is spelt |, the m being placed after the š (see Lacau, Rec. des Trav., and Sethe, Verbum, i. 277).
(10) | im’hwr hr njwšw "Honoured by the great God"
(11) | im’hwr hr njwšw r’nb "Honoured by the King every day".

PLS. XVIII, XIX.
Panel. The deceased is seated before a table of offerings, by the side of which is a short formula wishing every possible good thing.

Architrave. The usual formula ḫtp dj ni-swt,
desiring for the deceased a good burial and also funeral offerings on all feast days.

_Drum._ Name of the deceased with the most important titles.

_Side columns._ On the left the titles of the deceased. On the right a _ḥtp dḥ ni-swt_ formula: “May Anubis, who is in Ut, grant that he may go upon the beautiful roads every day to the Field of Offerings, to the places . . . as an honoured one, the (titles), Ateta.”

---

CHAPTER V.
_by Kart Sethe._

22. **TOMB OF USER-NETER.** _pls. XX–XXV._

_Name._ [Image] Read Hôtel “The God is mighty”, a form like [Image] Hôtel-kh-f

“His ka is mighty” (Osípóptipj). In writing, the word “God” is put first in the customary manner. The use of the generic word _nṯr_ “God” in place of the name of a special god must not be taken as a sign of a monotheistic conception; what is meant is the god of the city in which dwelt the person so named.

On the drum of the outer door he is called [Image] “The old” to distinguish him from a younger member of the family with the same name, perhaps a grandson.

_Titles._

(1) [Image] _mḥw ḫmjt_ “First under the King”.

This must be the principal title of the deceased, as it begins every column of titles and is the only one mentioned on the drums of the doors.

(2) [Image] _mḥw ḫmjt_ “[Spokesman of the rekhwayl]”.

(3) [Image] _imj-r sš ‘ ni-swt_ “[Intendant] of the scribes of the documents of the King”.

(4) [Image] _imj-r ḫmjt_ “[Intendant] or

(5) [Image] _hrpt ḫmjt_ “[Controller] of the Wide Hall” (the royal palace).

(6) [Image] _sš ‘ nb – nr_ “Judge and [conservator of canals]”.

(7) [Image] _sw ḫm ḫmwt_ “Great one of the [council of] Ten of Upper Egypt”.

(8) [Image] _šḥd wr(w) md ṣm‘w_ “[Expert] of the [Mayors of the council] of Ten of Upper Egypt”.

(9) [Image] _ḥnmt._

(10) [Image] _imj-r ḫt nḥt nt ni-swt_ “[Intendant] of all the works of the King”.

(11) [Image] _hr ṣst_ “Over the

(12) [Image] _hr ṣś ṣw ṣir ṣpr_ “[Controller of the

(13) [Image] _hr ṣś ṣw ṣw_ “[Controller of all

(14) [Image] _hr ṣś ṣw ṣw_ “[Controller of all scribes]”.

(16) [Image] _smw ḫt_ “[Elder of the registers]”.

This title is held in the Pyramid Texts, T. 87 passim, by the servant of the god Ptah, who is regarded as the god of art and handicrafts.

(17) [Image] _hm-nṯr Ṣ‘t_ “Prophet of the
goddess Maat”.

(18) [Image] _imj-r ṣrt_ “[Intendant] of the

(19) [Image] _hrj sb‘ ṣm‘ ṣm‘_ “[Over the
secrets of private decisions] of the Great House”.

The “Six Great Houses” is the term for the higher Courts of Justice of the country, the Court of Appeal, and others.

(20) [Image] _imj ṣb ṣr_ “The favourite of

(21) [Image] _hrj sb‘ ṣm‘ ṣm‘_ “[Over the secrets of the divine words]”, i.e. the ancient holy language of Egypt.

(22) [Image] _hrj ṣm‘ ṣm‘_ “Overseer

(23) [Image] _im‘w_
Honoured by the gods, the lords of the necropolis.

Honoured by the great God.

Date. The middle of the Vth dynasty, as the eldest son appears to have been contemporary with Dad-ka-Ra.

Family.

2. Pls. XXI, XXIII. Son.

Description of the plates.

Pl. XX. Stele of the west wall. In the upper and outer pair of columns, the titles of the deceased are combined with the formula for the dead. Above: "May the King be gracious and grant, may Anubis be gracious, he who is before the Hall of the God, he who dwells in Ut, that he may be buried in the necropolis at a good old age" (titles) "User-neter".

Right and left: "May Osiris be gracious and grant, he who is before Dedu" (Busiris in the Delta), "that he may go in peace upon the beautiful paths of the West, on which the honoured ones" (i.e. the blessed dead) "go to the great God, the Lord of the necropolis" (here follow the titles) "User-neter." It is worth noting the omission of the King in this formula.

Pl. XXV. The drums of the two doors. As usual these mention only the name of the deceased with one of the principal titles, here tpb hr ni-sw.t. On the drum of the outer door, which was naturally the last to be inscribed, he is called "the old", to distinguish him from a younger person of the same name (see p. 18).

Architrave. The deceased seated; before him an inscription consisting of his titles and three wishes for him: (1) "That he may be buried in his grave in the West, at a good old age, by the great God." (2) That funeral offerings may be brought to him on the Great Festival, the festival of the Heat, the rising of Min, and all other festivals through the length of eternity. (3) That he may go on the beautiful roads of the West, on which the gods love to go, in peace to the beautiful West, to the gods, the lords of the West.

On the walls of the doorway are very suitably placed the representations of the funeral priests bringing offerings for the dead into the tomb.

Inscription: The bringing of offerings by [the servants of the ka] who act w'b (for the deceased).

The deceased (with his titles inscribed above him) sits before a table of offerings. Above the table is a great list of offerings which are brought to him by numerous persons in five registers.

First register. (a) Two men kneeling, each presenting two vessels. The offering of liquids (hkn in wjt "The offering of liquids" (hkn written with an arm presenting a vessel) "by the Uty-priests".

(b) A Lector-priest, recognisable by the band across his breast, holds a roll of papyrus, and with uplifted hand recites a text. Offerings shall be made every day”, he says.

1 Mariette, Mastabas, p. 95.
2 The before is omitted.
3 The is omitted.
(c) Man bringing two strips of cloth  wbjw “Two bandages”.

(d) Man offering incense. k’p šntr “The burning of incense”. The first sign is remarkable. The thrusters recur in each of the following registers, as it is the necessary form for the consecration of offerings. The inscription is always the same.

Second register. (a) Kneeling man pouring water on the ground. s’t “Pouring on the ground”. Cf. No. 1 of the list of offerings. The word is a determinative of s’tw “Ground”, Coptic ečt.

(b) Standing man pouring water from a pitcher. The inscription (probably k’bš) is broken away.

(c) Man offering incense. Inscription as above.

(d) Three people without inscription.

Fourth register. (a) The eldest son of the deceased Shepses-Ra (see p. 19) offers a goose.

(b) The second son, User-neter, offers incense.

Cf. Nos. 2 and 13 of the list of offerings.

(c) Man bringing two strips of linen. wbjw. Cf. No. 12 of the list.

(d) ‘[Servant of the ka]” pours water out of a jug “Liberation of two drops”. Cf. No. 14 of the list.

(e) Man carrying a platter for food hpt ni-šw “Royal offering”. Cf. No. 16 of the list.

(f) Man carrying a little table with food f’t. Cf. the and of the offering lists in the Pyramids and elsewhere.

(g) People with various gifts.

Fifth register. (a) Man offering a goose. No inscription.

(b) Incense bearer. Inscription as above.

(c) People with various gifts.

Below all these scenes runs a sixth register, in which the slaughter of oxen is shown. Beginning on the right:—

(a) A hornless animal is being bound “The bringing of a heifer for the monthly repast”.

(b) Three scenes of slaughtering, in each of which on the right is a butcher sharpening his flint knife by chipping “Sharpening the knife by the butcher”. In the first scene the ox is eviscerated. hbr b’tj “Give me the heart”, says the impatient man on the left, who is already laden with the haunch and is waiting to carry the heart away. In the second scene a fore-leg, in the third a hind-leg, is being removed. itj ir-k “Take”, says the man, who holds the leg, to the operator.

(c) The pieces cut off the slaughtered animals, called in Egyptian śpt “The chosen”—haunches, rib-pieces, and hearts—are carried away shp śpt “One of the laden servants has the title of šhp śpt. One of the laden servants has the title of ” [Controller of the registered workmen].

Pt. XXII, East Wall.

Above the door, offerings.

At the sides of the door, the bringing of the sacrifice animals.

Left: (1) int rn m’hdl “The bringing of a young oryx antelope”. (2) A long-horned ox, which rubs its face with its hind foot. šbpt r n b’t “Bringing a young ox for the evening meal”. (3) Hornless oxen. šbpt hrjw- “Bringing hornless oxen for the festival of Thoth”.

Right: (1) The same as on the left. (2) Hornless ox without inscription. (3) An ox with artificially bent horns “The bringing of a young ox.”

Pt. XXIV. Niche.

The deceased seated, holding a whip, the symbol of authority. The inscriptions give his titles. In front of him on the ground sits his wife, Hnwt, Khenu.

Pt. XXIII. South Wall.

An exact counterpart of the north wall. The persons with inscriptions are:

First register. (a) “The gift to the ground”, as above, Pt. XXI.
Second register. (a) A \[ \text{scribe} \] " [Expert servant of the ka] " kneels on the ground, while a man standing behind him pours water on his hands, \( \text{rdj} \) \( \text{mhw} \) " Giving water ".

(b) A \[ \text{scribe} \] offers incense \( \text{khp} \) \( \text{sfr} \). See P1. XXI, first register, (b).
(c) The same as P1. XXI, first register, (b).
(d) The same as P1. XXI, first register, (c).
(e) \[ \text{scribe} \] offers incense.

(f) Lector-priest. \[ \text{scribe} \] \( \text{shpt} \) in \( \text{hthr} \) " The glorifying " (of the dead who is proclaimed a spirit 'h') " by the lector-priest ".

Third register. A man offering a goose.

Fourth register. (a) and (b) The two sons of the deceased, without gifts.

d) The other persons have no inscriptions, except a single man who is simply called \( \text{scribe} \).

Fifth register. (a) A \[ \text{scribe} \] \( \text{sfr} \) " The choosing ", i.e. To bring a sacrifice.

(b) A \[ \text{scribe} \] \( \text{imj-hl} \) \( \text{hmw-k} \) 'nb-f \( \text{bdw} \) " The [ka-servant], whom his lord loves, Abduy ", bringing gifts.

d) The other persons have no inscriptions, except a single man who is simply called \( \text{scribe} \).

Sixth register, beginning on the left.

(a) \[ \text{scribe} \] \( \text{int} \) \( \text{mthd} \) " Bringing a young oryx antelope ".

(b) Butcher cutting off part of the hind-leg of an ox. \[ \text{scribe} \] sft ift.

c) A \( \text{sfr} \) " Butcher ", while cutting off the foreleg, says to his comrade who holds the leg, \[ \text{scribe} \] Take ".

d) A man sharpening a knife \[ \text{scribe} \] \( \text{pdt} \) \( \text{ds} \) in \( \text{sfr} \). See P1. XXI, sixth register, (b).

e) Slaughtered oryx antelope, \[ \text{scribe} \] \( \text{mthd} \).

(f) Butcher eviscerating an animal. \[ \text{scribe} \] \( \text{shlt} \) \( \text{hlt} \) " Taking out the heart ".

\( \text{same as (d)} \).

\( \text{same as (c)} \).
5. hrj ššt n... nṯr "[Over the secrets of the sealer] of the God ".
6. hrp ḫmst nbt “[Controller] of every art”.
7. bḥk nṯw. See p. 12.
8. wʾ Pḥ “Priest of Ptah”.
9. imj-r pr Skr m ššt-f nb “[Intendant] of the House of Seker in all his places”.
10. hrj ššt n nṯr-f “[Over the secrets] of his God”. Note: The spelling of nṯr with ḫ after the determinative is intended to show that it was still sounded before the suffix, though it was already lost, as in nḥt-r.
12. hrp šm “[Controller of vegetables]”.
13. dḥṭj “[Sealer]”.
14. mrr nb-f “He whom his lord loves”.
15. “[Devoted to] the King”.
16. “[Devoted to] Anubis”.
17. “[Devoted to] Osiris”.
18. “[Devoted to] his lord”.
19. “[Devoted to] the great God, lord of the West”.
20. “[Devoted to] Ptah”.
21. “[Devoted to] Osiris, lord of Busiris”.
22. (var. with ḫṣ) “Deputy prophet of the pyramid, Dad-ysut, of Tety”.

1 Pls. XXIX, XXX, where the ḫṣ belongs both to ṣmḥw ḫṣ and to Shepses-Ptah.
of Pharaoh, Men-ahy”. Men-ahy contains the name of Ahy, the little son of Hathor, Lady of Dendera.

Pils. XXX, XXXI.

12. [Hieroglyphs]

13. [Hieroglyphs] Spdw[ps]Pl. XXXI.

Pl. XXXI. Outer Walls.

The deceased and his wife, with their titles and names.

Doorway. The deceased; before him his son Sabu (see above, No. 2). Below, bearers of offerings, on the right without names, on the left Nos. 11 and 12.

Architrave. The left end only remains. Htp dj ni-swt formula, in which Osiris, Anubis and the Khenty-amentyu (hnty-imn[tjw] are named. The wishes for the deceased are that he (may go upon the beautiful roads of the west) “on which” (the honoured ones go) “to the great God”.

Pils. XXIX, XXX.

The deceased sits in front of a table and a pile of offerings which are enumerated in a list. Funeral-priests and servants (for whose names, see above) bring him gifts. m ‘r ngl-hr inwt m hkw t ni t m-nb šm “Seeing the tribute brought from his towns and villages in Lower and Upper Egypt”.

On Pl. XXIX in the topmost register an oryx antelope is being dismembered. [Hieroglyphs] “The dismembering of a young oryx”.

On Pl. XXX, in the corresponding place, an ox is cut open. [Hieroglyphs] “The taking out of the heart”.

Pil. XXVIII.

The False-door of the West Wall. Above: a htp dj ni-swt formula in which offerings on all festival days are desired for the dead. Under the panel, in which the deceased sits before a table of offerings smelling a vase of ointment, there is a htp dj ni-swt formula wishing him a good burial.

On the outer columns at the sides of the stel there are, on both sides, the names of the seven sacred oils:

1. [Hieroglyphs] šfj-hb “Festival perfume”.
2. [Hieroglyphs] hknw.
3. [Hieroglyphs] šf[t.
4. [Hieroglyphs] n1-hmn.
5. [Hieroglyphs] tw‘wt.

6. [Hieroglyphs] h’tt ‘s “Oil of cedar”.
7. [Hieroglyphs] h’tt lhw “Libyan oil”.

CHAPTER VI.

25. Tomb of Sekhem-kay. Pl. VII.

The tomb of Sekhem-kay appears to have been entirely omitted in Professor Sethy’s MS. I am therefore constrained to rectify that omission myself, which I do with some trepidation as my knowledge of the early periods is necessarily far below his.

Name. [Hieroglyphs] “My ka is mighty”.

Titles.
1. s‘b irj Nḥn u ḫw wr “Judge belonging to Nekhen of the House of the Great One”.
2. ḫw šš “He who is over the secrets”.
3. ḫm-nfr M’t “Prophet of the goddess Maat”.
4. ḫm-nfr Sq “Prophet of the god Sed”. This is a jackal god, of whom nothing is known.
5. ð‘ m‘t u nb-f “True . . . of his lord”.
6. wḏ-mdw n‘ “Actual commander”.
7. ḫj ḫw ṭwbw “Belonging to the overseer of lands”.
8. ḫj ḫ n1-swt “[Courtier]”.
9. w‘b n1-swt “Uab-priest of the King”.
10. ḫm-hnw ḫw nfr “Worthy before the great God”.
11. ṭw ṭb-f “Beloved of his lord”.
12. ḫm-nfr ṣḥḥ ṣ ‘ ḫ ‘ R “Prophet of Shepseka-Ke-Re”.

The middle sign of the cartouche is obliterated; it is possible that it may be ḥḥ, not ḫḥ, in which case the cartouche would be that of Dad-ka-Re’.

13. ḫm-nfr ḫḥthr m ṭbw “Prophet of Hathor in the Place-of-the-Heart”. This is apparently the name of the obelisk of Hathor (cf. her name at Dendera).
14. ḫm-nfr N-ḥḥsr-R’ “Prophet of Ne-user-Re’”.

Family.
1. Wife. ḫḥf-f ḫr ṭw ḫ “His wife, [Intendant of the servants of the ka, Courtier], Khenty-kau-ès”. The name means “She who leads her kas”.
2. Son. s‘f šmḥ ṭb hr ḫn‘ s‘b ḫ ṭw ṭb ni-swt ḫj ḫ n1-swt ṣḥḥ ṭw ḫ “Hathor of the youngest [son, of worthiness, [judge, expert scribe], ub-priest of the king, [courtier], Sekhem-ka-y, the younger” (lit. “the little”).
3. Son. s‘f s‘b s‘ ḫ “His son, the judge scribe, Qay”.
4. Daughter. s't-f Ḥnwt "His daughter, Khnut".

5. Daughter. s't-f Īntj "His daughter, Ynty". It is tempting to see in these two daughters the wife of User-neter and the wife of Shepnes-Ptah II. Unfortunately the identification cannot be proved.

Inscriptions.

Architrave. Three horizontal lines, of which the topmost is almost entirely obliterated. (1) "May the King give an offering . . . (2) May Anubis give an offering, Chief of the Hill of the Snake, He who is from the Oasis . . . (3) May Osiris give an offering, Leader of Dedu, funerary offerings for him on New Years' Day, on the festival of Thoth, on the First of the Year, on the festival of Uag, on the festival of Seker, on the Great Festival, on the (festival of the) Heat, and the going forth of Min".

False Door. Two horizontal lines along the top, of which the upper is almost entirely destroyed. (1) "May Osiris give an offering, the lord of Busiris". (2) "May the Gods of the necropolis give an offering." The name of Sekhem-kay is inscribed vertically across both lines at this point. Line 1 is obliterated, but line 2 continues: "Funeral offerings for him of bread and beer on New Year's Day . . . on the festival of Seker . . . on the Monthly festival and the two Half-monthly festivals". Crossing both lines vertically: "The uab-priest of the King, Sekhem-kay."

Central portion.

Panel. The deceased and his wife before a table of offerings. Their names and titles are almost completely obliterated. Above and to the right of the table is the list of offerings, ending with the dedication to "the judge, belonging to Nekhen, Sekhem-kay". Two horizontal lines of inscription below the panel: (1) "May the King give an offering, may Anubis give an offering, funeral offerings for him of bread and beer from the altar, on (the festivals of) the Month and the Half-month to the extent of eternity. (2) May be given to him grain from the Granary, clothing from the Treasury, pieces of meat . . . and a going forth among the worthy ones to the God." Crossing both lines vertically: "The judge, belonging to Nekhen, Sekhem-kay."

On each side of the panel is a scene. On the left the deceased is seated on a high-backed high-armed chair; he wears a wig of long straight locks, and holds in his right hand a fly-flap, in the left a short staff. At his feet sits his wife Khentyt-kau-es, her right arm embracing his legs. Under the chair his dog Pesesh (Ps) lies asleep, its nose on its paws, and the ribbons of its collar lying flat on its neck. On the right of the panel the deceased sits on a chair like that on the opposite side. He wears a short-curled wig; he holds a fly-flap in his left hand while his right is stretched out towards the offerings piled before him. Under his chair the dog Pesesh is awake, with head raised and the ribbons of its collar standing out from its neck.

Inner Jambs.

Left. The deceased standing, facing right. He wears a short-curled wig, and over his body is a conventionalised leopard skin. In his left hand he holds a long staff, in his right a cloth; above him are his titles and name. In front of him is a small figure of his eldest son, who grasps his father's staff. Above the son's head are his titles and name. Below this scene is a register of five bearers of offerings:—

(1) ħm-k' Prnb "The ka-servant, Perneb", holds up a jar. mw (nm)št "Water libation, a nemsat-jar".

(2) ħm-k' Ššk "The ka-servant, Sesk", carries a demoiselle crane. šḥpt šḥpt "Bringing the choice bird".

(3) ħm-k' Tššt "The ka-servant, Tety", has a gazelle across his shoulders. ḫt gšš "Carrying a gazelle".

(4) ħm-k' Īmn "The ka-servant, Ynen" has a young hyaena in his arms. ẖt ḫt "Carrying a female hyaena".

(5) ħm-k' Prhw "The ka-servant, Perkhâ", has a goose of the kind called ḫpt "Thorpe", in his arms. Right—The deceased standing, facing left. He wears a short beard and a skull-cap; in his right hand he holds a long staff, in his left a cloth; his titles and name are above his head. In front of him is a small figure of his wife with both titles, and name above her. Standing between her and the long staff of Sekhem-kay is their younger son, Qay. He wears the lock of youth and holds fast to his father's staff. In the register below, five men bring offerings. The general title of the whole scene is šḥpt pr-hrw "The bringing of funerary offerings".

(1) ħm-k' ḫpt "The ka-servant, Ypet", bears a basin and ever in one hand and a bird in the other.
(2) hm-k' ḫntj "The ka-servant, Yny", opens a censer, against which is the word ṣḥf "Incense".
(3) hm-k' ḫntj "The ka-servant, Qedhesh", carries two pieces of cloth, ḫntj.
(4) hm-k' ḫntj "The ka-servant, Khenu", with a goose in his arms; ḫntj śdw "Carrying a ser-ru-

(5) ṣḥf-hṣt Nbhw "He who belongs to the vase, Nebu", carries a jar on his head. ḫntj mww "The
bricking of water".

Outer Fams.

These correspond with one another in arrangement. On each side are five registers. In the top-
most are the family and friends; in the second and third are bearers of offerings; in the fourth and
fifth are scenes of the sacrifice of oxen.

Left—(1) First (top) register. The seven figures represent Sekhem-kay’s family, placed in the
following order: Eldest son, younger son, two daughters, grandson, and two unnamed persons,
possibly intended for young infants or even unborn children.

(2) The second register has five men bringing birds for the sacrifice. They are led by ḫḥt ḫntj
II’s-h "The [expert] ka-servant Uash-ka". The inscription of the whole scene reads ḫḥt ṣḥp sḥpw m
wq ḫḥtj šḥn ...nt m ṣḥw ḫntj "With the choicest of

(3) Five bearers of offerings, without inscription.

(4) Four butchers dismembering an ox. On the right the butcher Qedhesh says to his assistant
Ḥḥt ṣḥw ṣḥpw ḫḥtj "Pull thou, O butcher!". On the left another butcher is skinning the animal; above
him is the inscription ḫḥt šḥt "Cutting up the ox". The assistant is whetting his knife, ḫḥt ṣḥw "Sharpen-
ning the knife".

(5) In the lowest register are four men; two carry portions of the dismembered ox, ḫḥt ṣḥpw
"Bringing the choice pieces". The third man is removing the heart from the carcass, ḫḥt ḫḥtj "The
taking out of the heart". The unusual shape of the heart determinative should be noted. The
fourth man is sharpening his knife.

Right—(1) Seven men in the attitude of respect with the left hand holding the right shoulder;
their names and titles are given.

(a) św-ḥḥt wجب Ṣḥḥw-m’t-ḥḥt "The brother of

(b) św-ḥḥt šḥt šḥt Nb-hṣ-ḥḥt "The brother of eternity,
the judge scribe, Ni-ka-ankh".

(c) śḥt nḥ-ḥḥt ṣḥp ḫntj nḥw "Scribe of the
accounts of the King, [expert] ka-servant, Ankhu".
(d) śḥt ṣḥw ḫḥtj Nḥw "The scribe of the
Treasury, [expert] ka-servant, Ny".
(e) śḥt ṣḥw ḫḥtj Tntj "Scribe of the Treasury,
[expert] ka-servant, Thenty".
(f) śḥt śḥt ḫḥtj ḫntj Nḥw "The judge scribe of
the fields, [expert] ka-servant, Nefer".
(g) śḥt śḥt Ṣḥḥw-Pḥḥ "The judge scribe, Shepse-
Pḥḥ".

(2) Five men bearing offerings, of whom only
the first is named: Ṣḥḥw šḥt Gw "The leader of the
shrine, Gua".

(3) Five bearers of offerings, without inscription.

(4) Scene of sacrifice. General title: ḫḥt ṣḥp sḥpw
"Bringing the choice pieces". The scene is
presided over by šḥt Nḥw "The judge scribe,
Nefer". He says to the butchers, ḫḥt šḥt "Cut
properly". Two men are removing the fore-leg of
an ox; the chief butcher says to his assistant,
who holds the leg, ḫḥt šḥt "Pull". Behind him
another butcher holds a flint knife and a whetstone,
ẖḥt ṣḥp "Sharpening a knife".

(5) The lowest register has another scene of
sacrifice, without inscription.

CHAPTER VII.

DETAILS FROM THE TOMB OF TY.

26. PLATES II–VII. In Steindorff’s Grab des Ti
the scale of reproduction is too small for the detail
to be clearly seen; these figures are therefore
published in a larger size, as they are among the
finest examples of the skill of the Egyptian artist
in depicting animals and birds. The references
throughout this and the succeeding chapter are
to Steindorff’s publication.

PLATE II.—(Ti, ii, pl. 113.) The scene of a
predatory animal climbing the reeds to attack a
nest of fledglings, and the mother bird flying to
the rescue, is a common motive in Egyptian art,
and occurs in most of the scenes of the marshes.
Like all the best sculpture in the tomb of Ty, the
artist of this scene, though greatly hampered by
convention, has succeeded in introducing some
dramatic touches. The catlike gliding motion of
the mongoose along the papyrus stem, which bends
beneath the weight, and the shivering terror of the
little fledglings, are well rendered. The adult
bird, in this case a pintail duck, is entirely con-
conventional in drawing; its attitude does not suggest the impassioned speed of the despairing mother. One is therefore tempted to believe that the mother

bird was done by another hand, possibly a journey-

man sculptor who had not yet dared to go beyond the limits of pure convention in spite of his technical skill.

PLATE III (1). (Ti, ii, pl. 113.) The second

representation of the tragedy of the marshes is

neither so interesting nor so convincing as that on pl. xiv. The fluttered and screaming nestlings are less tragic than the silent and trembling little

birds. The animal, which appears to be some kind of fox, is too heavy for the stem up which it is

sedately walking. In comparing the two scenes, it is clear that they are by different artists. Though the technique is equally good in both scenes, the
dramatic touch has been missed by the second

artist, whose want of observation is shown by his

placing the animal on the wrong part of the bent

stem. The first artist very properly placed his

animal on the horizontal part of the stem, where

its footing would be secure, and the paws, which

are not those of a climbing creature, would not be

noticeably out of place.

So little is known about the artists who sculptured

the tombs at Saqqara that it is always worth while to look for indications of individuality. The tomb

of Ty, owing to its size and the extent of its decorated

surfaces, is one of the most important for this

purpose. In that mass of material it should be possible, by intensive study, to differentiate the

work of the various artists.

(2) (Ti, ii, pl. 112.) The scene of cattle crossing

a canal under the charge of herdsmen is common in

tombs of this period. The little procession is always headed by a calf carried on the back of one of the cow-herds, in this case a young boy.

The little creature turns its head and calls in terror to its mother, who replies. The party are obviously

nearing the bank for the water is not up to the knees of the calf-bearer, while the cows are still almost

breast-deep.

27. PLATE IV, 1–10. (Ti, ii, pls. 112, 114, 115,

117, 118.) Details of offerings. Of these No. 1

(Ti, ii, p. 117) is important. It represents a shed

where various kinds of food were prepared and then

hung on a horizontal pole which is supported by

posts. The two objects on the left are tied to a
cord fastened to the pole and are not attached to

the pole itself. The first of these objects is un-

explainable; the second is a fish split open and

cleaned, ready for cooking. This is peculiarly

interesting for the fish, like the ox head, was tabu

as a food according to late texts and classical

authors. Though fishing scenes abound, both as a

sport for gentlemen and a livelihood for peasants,

it is rare to find the representation of fish used as

food (cf. Petrie, Medium, pl. xii). On the right hand

side of the post four long narrow objects with square

tips are suspended from a short bar which hangs

from the pole; they appear to be threaded on the

bar from which they hang. Attached to the lower

end of each of these objects is a similar object,

smaller in size and with the end pointed, not unlike

the hieroglyph of a dagger. I can offer no suggestion

as to what these were intended to represent; they

may be some kind of vegetable prepared for cooking.

Another group of four objects hanging alongside

are, I think, root-vegetables peeled and scraped

ready for boiling. A slender pointed pot sealed with a large cap of clay is the next object. Then

comes a group of an earthenware stand filled with

loaves (?), and flanked on either side by a globular

vase, one of which hangs from the pole, the other

from the stand. Next is an object like a thick

sausage; it is obviously soft for it is thinner in

the middle where the suspension cord compresses it.

A round object, a pat-cake perhaps, judging by

the marks on it, has a hole in the middle through

which the suspension cord passes. Below it hang

four more of the root-vegetables. This is an im-

portant and interesting series for the study of food

in the Old Kingdom.

11. (Ti, ii, pl. 115.) Two registers from one

scene. In the upper register a dwarf leads a monkey

larger than himself. He carries a stick carved at

one end like an open hand; this must have been

for beating the monkey. The lower register shows

a boy leading two hunting dogs. The curious

distortion of the boy’s right shoulder is apparently

an attempt to portray a figure in profile; similarly

distorted figures occur several times in this tomb.

Such artistic experiments are found occasionally

in the Old Kingdom but are more common in the

Middle Kingdom.

12. (Ti, ii, pl. 120.) The young ox, rather

cruelly muzzled and tethered with too short a

halter, is a good study of an animal almost full-
grown yet retaining some of the aspects of an

immature beast.
13. (Ti, ii, pl. 129.) The group of demoiselle cranes, herded together by a man at each side, is a fine example of the decorative effect beloved of the Egyptian artist. The central group of a single bird with a pair on either side is symmetrical, but the rest of the birds are diverse in attitude. The delicate outline and the exquisite detail make this little crowd of birds one of the most charming and delightful scenes in the whole tomb.

28. Plate V (1). (Ti, ii, pl. 112.) In the new-born calf the artist has been peculiarly successful in his rendering of the rounded forms and loose-jointed build of a very young animal.

2. (Ti, ii, pl. 112.) This animal is more conventionally rendered and has not the same youthful springiness of gait as the calf.

3. (Ti, ii, p. 115.) In the full-grown buck the hoofs show that the animal had always lived on the soft straw-strewed floor of the farmyard and had never had them hardened by the abrasive sand and rocks of the desert; it must have been bred in captivity. I have already pointed out (Saq. Mast. I, p. 13) that the little animals led by the farm women are miniature creatures specially bred by wealthy owners. In the series of three animals here given, the size is indicated by the new-born calf, the fawn is rather smaller, but the full-grown buck is only very slightly larger. The two young animals are tied by a twist of cord round the hind leg; the buck is more strongly secured by a double twist round the front leg.

5. (Ti, ii, pl. 118.) The little hedgehog in a cage is interesting, for the number of representations of this creature in Egyptian art is remarkable. In the Old Kingdom they appear in landscapes and, as here, as offerings; later, figures of hedgehogs are found, of blue faience in the Middle Kingdom, of other materials (usually pottery) in the New Kingdom; they are known as late as the Ptolemaic period. The animal was either very common or the peculiarities of its appearance and behaviour drew the attention of the artists. As it is so often included among the offerings of food-animals in the Old Kingdom, it must have been, like the hyaena (see Saq. Mast. I, p. 29), a food-animal whose use did not survive.

4. (Ti, ii, pl. 114.) A box-like crate of young ducks is also a common offering. The box was probably of osier or papyrus, the bars being omitted by the artist as confusing to the spectator and obscuring his view of the offering.

7, 8. (Ti, ii, pl. 129.) The two magnificent birds are finely differentiated in shape and markings. The hap is a rarer bird in the offerings than the re. The former is common in the hieroglyphs as the writing of the name of Hapi, one of the genii of the dead; but it does not occur in offerings after the Middle Kingdom. Here it is clearly the pintail duck. The re is the principal bird found in the offerings from the earliest to the latest periods. It was clearly a large handsome bird and popular as a denizen of the farmyard; it was probably more prolific and more easy to rear than the hap.

9. (Ti, ii, pl. 129.) The pekhet with its full crop is the origin of the ‘k of the hieroglyphic script. The markings on the pinions distinguishes it from the other two birds. The distended crop appears to be its characteristic as a hieroglyph.

CHAPTER VIII.

Hieroglyphs from the Tomb of Ty.

(Plate numbers in brackets refer to Steindorff's "Grab des Ti").

29. Plates VI and VII. These special hieroglyphs from the tomb of Ty are published here as being either unusually fine examples or as showing some peculiarity. The greater number are too well known to need comment, and the notes therefore refer only to those which have some special interest. References are given only to the rarer signs.

1. (Pl. 133.) Read yri. The fillet and feather headdress are unusual. For the knobbed sticks and the beard, see Saq. Mast. I, pl. xxxvii, 3. In late writing the figure is often female.

2. (Pl. 48.) The ordinary determinative for a man. The beard is a rare feature in this sign.

3. (Pl. 71.) Read yn. This sign belongs almost entirely to the Old Kingdom.

4. (Pl. 125.) Read f; it means "to carry", a combination of the determinative and the principal consonant of the word.

9. The alphabetic sign for h. There used to be much uncertainty as to the meaning of this sign; it is now supposed to be the representation of the placenta (see Murray and Seligman, in Man, xi, pp. 165-171, in Borchardt, Das Grab-denkmal des
Sahu-re', ii, pp. 76-7. Also Sethe, Dramatische Texte, passim).

13. The hand with water pouring over it is the usual indication of the use of the ewer and basin among the offerings. The earliest examples of this group are on the stone bowls of the 1st dynasty.

31, 32. Read ḫ. This sign standing alone is the name of a king of the 1st dynasty; it then probably reads Wazti (Wḏḏ). It is the fetish or crest of the town of Aphroditopolis and is then represented with the feather of the west on its back, which seems to indicate that there was another snail-nome on the east side of the Nile. As the sacred object of Aphroditopolis it reads Wḏḏ, which is the same as the cobra-goddess of the North. The creature must therefore be either the hooded cobra with the hood down, or that equally poisonous snake, the hoodless cobra, which is still known in Egypt.

41. The small vulture is the alphabetic sign 𓊱. This sign is generally called aleph, but the sound of the Arabic aleph would not account for its use in the transliteration of foreign words into Egyptian or for the various vowels which replace it in Greek and Coptic when Egyptian words are transliterated into those languages. I suggest that it stands for the sound called ḫāma in Arabic; any language which did not possess that sound would omit it in transliteration and use only the vowels which follow it.

47. (Pl. 125.) Read ḫ. This is a composite group of the determinative and the principal consonant of the word.

56. Read ḫḏ.t. It is the name of one of Ty's farms, and consists of the usual town-sign surmounted by three ears of bearded wheat. The little bunch of three ears is found in Steindorff, Grab des Ti, pl. xliv, where it is held in a man's hand; and again in pl. cxxiv a reaper grasps a similar bunch, preparatory to cutting it off.

62, 63. (Pls. 85, 88.) Read ḫn. The divergence of form in this sign in early examples makes it one of the most interesting of the hieroglyphs. It always represents a young shoot, either flower bud or leaf bud, and the choice of the plant appears to have depended on the individual artist. Why the later scribes should have conventionalised it, in the form of one of the compositae, is not clear.

105. Read šmt. Late forms omit or alter the detail, and confusion has arisen in attempts to explain the true meaning. This example shows a heavy staff with a curved top; to the middle of the shaft a large packet is lashed, and the ends of the lashing project above and below the package. In some examples the upper end of the lashing is drawn like a knife, though it would be impossible to carry a knife or any other long narrow object at that angle. In late examples the lower end of the lashing is lengthened and drawn like a human leg and foot. [In this case it represents the follower carrying the hunting shield on his back, and holding the hunting knife. F. P.] As the sign is the determinative of the verb "to follow", it probably represents the equipment which a servant carried behind his master, perhaps when hunting.

114, 116. The development of the plough from the hoe is clearly seen in these two signs. The handle of the hoe elongated becomes the pole for yoking the draught animals, the blade becomes the ploughshare to which are attached the plough-handles for guiding it. The rope lashing of the two implements is exactly the same.

121. (Pl. 133.) Read ḫm-t. This sign is so commonly used as the word for "woman" that its origin is generally overlooked or forgotten, and it is therefore regarded as some kind of female organ. It is, however, also used as the determinative for "copper", and in detailed examples is always represented as being full of liquid. Its proper colour is blue, the invariable colour for copper in the hieroglyphs. It represents a crucible for melting copper. Crucibles are known from Badarian times, and though they sometimes have a spout to facilitate pouring they are often only plain circular pots. In this instance the thickness of the walls of the vessel and its long narrow shape show clearly that it was a crucible.

133. (Pl. 129.) A rare sign representing a plaited basket with a long handle ending in a knot.

141. Read ḫr. A charming example of the bunch of papyrus stems, cut into lengths and tied with a rope. Bundles of stems of this kind occur among the food offerings in the Old Kingdom, either lying in baskets or carried by offerers. The sign is used as the name of a king of the 1st dynasty, and is there the earliest example of a king being personally connected with the food supply. A later king of the same dynasty bears a name, Udy-mu, which again shows the idea of the king as connected with
fertility. Professor Petrie suggests that the bundle of stems represents flax, which would also indicate a reference to agriculture.

142, 144. Read im’h. No real explanation of this sign is as yet forthcoming. The proper colour of it is red, which may mean wood or cloth. The structure of the object suggests wood, but the loop suggests thread or string. No example of the object in use has yet been found among the tomb scenes; it therefore remains among the unexplained hieroglyphs.

145. The sandal shows both toe-strap and ankle-strap. The ankle-strap does not appear to have been tied; it must have been a loose ring of leather over which the toe-strap was fastened. Sandals were common in the Old Kingdom. Still earlier they were probably part of the royal insignia which later became democratized. Nar-mer’s sandals are carried by an attendant when he was in action. The earliest instance of sandals is the model pair in ivory of the predynastic period (Petrie, Diospolis Parva, pl. x, 19, p. 22); they appear to be amulets.

148. (Pl. 129.) Read h’h. This is one of the mysterious objects used in the ritual dances of the king. In the early examples it is not a true rectangle; here it is slightly obtuse, while in the ritual object in the XIIth Dynasty (Petrie, Koptos, pl. ix) the angle is acute. It represents the corner-piece of a reed hut, and is a bundle of reeds lashed together and bent so as to form the angle-piece of the thatched roof where it joins the wall. Part of the thatch is shown lying over the angle-piece. The sign is used as both determinative and ideogram of h’h “to conceal”, an appropriate meaning for such a method of roof construction. Its use in ritual dances may refer to the king as a temple builder, and would thus bring him into connection with the goddess of building as well as the gods who possessed temples.
